MODULAR DORMITORY WALLBED SYSTEM

You can plan your SICO Modular Wall Bed System with any quantity of units in combination. First choose the number of twin-size basic frame and bed mechanisms you want in either regular or extra-long. Then order the same number of headers and mattress and box spring sets. Now complete the system using cabinets and verticals.

CHOICE OF FINISHES

Standard cabinet and bed face finishes are your choice of Frosty White, Natural Almond, Black, Bannister Oak, Fusion Maple or Wild Cherry high pressure plastic laminate finish, or any WilsonArt plastic laminate matte finish from "The Standards" line. For WilsonArt or Oak veneer, please contact SICO for prices.

FREE SPACE ANALYSIS

Send blueprints or fully dimensioned drawings of your space to SICO America, Inc., along with your sleeping and storage requirements, and you will receive a drawing showing the best way to utilize your space, along with a material list of equipment required, and a price quotation. There is no cost or obligation for this service.

SICO MODULAR WALLBED SYSTEM SPECIFICATIONS

BED MECHANISM

Each bed frame shall be constructed of 16 gauge or heavier C.R.E.W. steel tubing, of electric arc welded construction, and electrostatically sprayed with a baked-on powder coat finish. Bed mechanism hinges shall be 1/8" or heavier steel, electric arc welded for extra long life under heavy use conditions. Each unit shall be provided with a slanted, padded headboard, vinyl covered, to hold pillows in place when the bed is folded for storage, and eliminate pillows falling off into bed recess during use. Bed mechanism shall be designed as to permit beds to be folded and unfolded into use position with a minimum of effort. When bed is in use position, bed shall come completely out of the recess and remain flush with the face of cabinets to eliminate user sleeping in recess. The factory-installed finished face of the bed, when folded, shall be in Frosty White, Natural Almond, Black, Bannister Oak, Fusion Maple or Wild Cherry high pressure plastic laminate finish, or any WilsonArt plastic laminate matte finish from "The Standards" line. Beds shall be provided with all the necessary hardware for complete anchoring to most concrete and wood floors, and shall operate independent of surrounding cabinet work. Each bed mechanism shall be provided with a base-plate for secure and proper installation.

BOX SPRING AND MATTRESS

Box spring and mattress sets shall be of commercial design and quality and shall be of either standard twin size or twin extra-long. Each unit shall be of coil spring construction and bed, when assembled with box spring and mattress, shall rest at a bed height of approximately 19". Box spring shall be vinyl wrapped on all four edges to eliminate soiling in use and allow easy cleaning. Box spring shall be securely fastened to bed frame with screws and "L" clips and mattress shall be provided with mattress strap with Velcro to attach mattress to box spring and frame.

CABINETRY

Bed cabinetry shall be of high quality workmanship, design and construction. Verticals shall be high quality particle board core 1 1/8" thickness to eliminate warpage and shall be laminated with WilsonArt plastic laminate faces and PVC finish on exposed edges. Closet units shall be 5/8" high quality particle board core with laminate on all exposed surfaces. Closet shall be 16 5/16" wide, and 22" deep.
